WORK EXPERIENCE

Full Stack Developer at Freelance January 2018- August 2018

<https://www.freelancer.com/>

Have been contributing to several freelance web development projects and client feedback has been nothing but positive.

- [www.edupages.com](#)

Service Technician at Micro Center May 2016- November 2016

<http://www.microcenter.com/>

Worked with a team of PC and Apple techs in the Service and Repair center of this consumer electronics store. This was a fast-paced, high-volume repair shop so documenting every repair step in a database was essential to keeping things running smoothly.

- Worked with a team

Sales & Business Development at Chicago Surplus Computer February 2014- November 2014

<http://www.chicagosurpluscomputer.com/>

My primary responsibility was connecting with schools and businesses to sell refurbished computers and electronics. However, sales is not one of my strong points so most of my efforts went towards setting up an ecommerce site.

- Built an ecommerce website

Technical Support at PC Rebuilder's & Recyclers March 2011- January 2014

<http://www.pcr.com/>

I joined as a bench technician refurbishing computers but was quickly promoted to tech support. This was at a time the company was growing quickly and the need for a full-time technical support position only just became necessary. I soon became a huge value to the company with The need soon came for a full-time Technical Support position and, as the most knowledgeable technician, I was quickly promoted the role. .

- Learned very quickly to Google first before asking questions
- Designed a database

EDUCATION

Bootcamp Web Development at Coding Dojo
